NovAccess Global is a translational biotechnology company developing novel immunotherapies for brain tumor patients, featuring recently approved United States patent #US9764014B2. The patent is granted under the "Cancer Antigens" category and related to the "treatment of cancer using vaccination therapy." The Company is working on future milestones of getting uplisted on OTCQB, filing for orphan drug status, and filing for Phase IIa IND application with FDA.

About NovAccess Global

NovAccess Global is a biomedical company accelerating novel cancer diagnostics and therapeutics. Our goal is to discover, develop and bring to market novel and innovative medicine and medical devices to improve the quality of care for cancer and neurological patients.

NovAccess Global is currently developing a cancer vaccine therapy that enhances the patient's immune response against brain tumors. Our Company has a novel immunotherapeutic approach to treat brain tumor patients with glioblastoma multiforme, the most common adult brain tumor with a 15-month median survival after diagnosis. Our patented technology is designed to combine a dendritic cell-based immunotherapeutic approach with a unique combination of Toll-like receptor (TLR) adjuvants, TLR-AD1, to help promote an enhanced immune response against the patient's tumor. Our platform technology focuses on enhancing the patient's immune cells to fight their unique cancer by utilizing the antigens specific to the patient's tumor. The Company owns a cancer vaccine, which is a medication that stimulates or restores the immune system's ability to fight existing cancer by strengthening the body's natural defenses against the cancer cells. It is a meaningful technology that could significantly improve the quality of life and prognosis for the

many people who suffer from brain tumors. For more information, please visit novaccessglobal.com.
