About NovAccess Global

NovAccess Global is a preclinical, IND-ready biomedical company accelerating novel cancer diagnostics and therapeutics. Our goal is to discover, develop and bring to market novel and innovative medicine and medical devices to improve the quality of care for cancer and neurological patients.

TLR-AD1 is designed to activate anti-tumor immune responses against brain tumors using immune-activating dendritic cells combined with the patient's own tumor proteins. The resulting dendritic cell vaccine is matured with a proprietary combination of Toll-like receptor adjuvants to enhance the immune-activating potency of the therapy. In 2022, the FDA granted Orphan Drug designation to TRL-AD1 for the treatment of brain cancers. The technology is currently at the pre-IND stage of research and development.
